

Artificial agents:

multi-agent reinforcement learning

rights are?

interaction

may shape personality

may also contribute to
~~the~~ model designing.
(shape).

⇒ Who is the one being
influenced more?

{ affect customer → goal.
being affected in their algorithm
→ goal.

Artificial ≈ Human being

↓
?

↓
second class?

How to classify ~~them~~ them in the society?

What about human being?

What about the people who don't want to be shaped? They are shaped eventually, because they are in the whole society.

Artificial agent → physically, a machine with ~~some~~ ^{certain} algorithm.

→ However, human being pour their emotions on to it.

→ It doesn't change the fact that it is a machine

But, will it change the sci

If you design a robot. ~~you~~ is and draw the customer to the product, ~~and~~ into their life span.

Do we have the responsibility ~~of~~ for their life span?
